THE IIHT TIMES
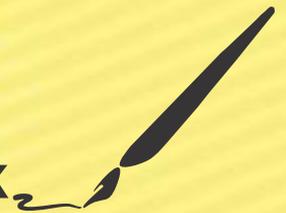

CEO's Desk

Dear All,

Though I have spoken about the importance of soft skills in my previous letters to you, I would still like to throw some light on the same fact, once again. Soft skills like communication skills, behavioural patterns, right attitude, industry etiquette and lot more, play a vital role in making any candidate worthy and employable.

These skills are as necessary as the technical skills, for every IT job aspirant. In order to stand out and be exclusive among the several trying to bag the same job, one has to learn to sell one's talents and capabilities. Now, the very opportunity that you have to showcase your worth is through your resumes and your performance in the interview.

N Keshava Raju
Founder and CEO
IIHT Group of Companies

Keeping this in mind, IIHT has launched the 'Job Ready Portal'. This platform is an initiative to assist you, in order to learn some soft skills. Here, you will find the best of resume and interview tips, you can attempt for both technical and aptitude tests and self evaluate and also learn a lot more. Associate with IIHT to benefit from this knowledge and wisdom that has been brought together by experts.

Happy Up-Skilling!

IT – A PART OF EVERY INDUSTRY AND BUSINESS!

What will jobs look like in 2030 and what skills will be in greatest demand? Not easy to guess! But Information Technology is sure to be – may be in an altogether transformed fashion. IT is to be there all the time to employ us and continue to impact our lives inside out.

IT- RESHAPING LIVES- IT is already transforming our homes in ways we could not have dreamed of only a few years ago, and these same technologies are also re-shaping the workplace and how we work and interact. This will have major implications for underlying business models and the way in which work is organised.

FUTURE OF IT - The Future of Information Technology and Implications for URI (Uniform Resource Identifier- example: the Web page address) Technology Change over the Next Ten Years Technology will be radically different with great improvements in increasingly shorter time spans as it becomes more personalized, more customized and more customizable. Just as automobile engines are no longer within the capabilities of the home "shade tree mechanic," IT will be complex to troubleshoot and integrate.

DIRECT & INDIRECT EMPLOYMENT - The potential contribution of IT to employment generation is both direct and indirect. Growth in computer hardware and software industries is generating direct jobs in India. Indirectly, the adoption of computer technology by other industries expands the range of services they provide and can stimulate more rapid growth of these sectors.

The indirect impact of IT is far larger than the direct impact. In the USA, it is estimated that for every direct job created in the IT industry, a minimum of ten additional IT-related jobs have been created in other industries in which IT is applied. This does not include the non-IT jobs created by the growth of other sectors of the economy under the stimulus of information technology.

SCENE IN INDIA - India's Ministry of Labour & Employment has just released their Quarterly report on "Changes in Employment in Selected Cities" which revealed that employment generation has increased 118 percent as 2.75 lakh new jobs have been created between July and December, 2014. The highlight is: Of these jobs ITeS and BPO sector created most number of new jobs: 89,000.

JOB CREATING & LABOUR SAVING - IT is both a labour-creating and labour-saving technology. As the introduction of automated machines replaced manual labour in factories and on fields, it was once believed that the spread of computer technology would result in massive job destruction. However, two decades of experience has demonstrated that the reverse is actually the case!

Student Testimonials

I'm proud to b an IIHTian. I pursued the course of ICCE from IIHT. I am really happy by my decision to join here as even before I completed my course I got placed at Replicon as Cloud Operational Engineer.I was helped a lot by the faculty & Management in clearing my interviews n making me understand every concept in the course.I wish all the luck to future IIHTians.

- Naveen Kumar
Placed @ Replicon

The Training was really good and useful for me to develop my Technical skills in Microsoft Server as well as Linux,VM Ware, Xen Citrix Server. This Entire Cloud Course were really helped me to get placed in HPE. Apart from the Private Cloud all of them were taught good.

- TamilSelvan
Placed @ HPE

HR - Testimonial

We appreciate the way IIHT have conducted the drive in their office premises on 2nd June 2017 and we are very happy about the services. We also like to appreciate the way they trained the students technically. Thank you for the cooperation and we are very happy for the quality of the students which we were looking for. We wish to visit IIHT every year.

Franchisee Testimonials

I have mastered the technical areas of networking and have completed my Masters in Computer Science & Engineering. Currently I am pursuing a Ph.D in Wireless Sensor Networks. I have undergone training in CISCO Certified Internetwork Expert (CCIE) – Routing & Switching. I started my career as a Technical Support Engineer and later became an academician due to my passion for teaching. I served as an academic trainer in a reputed Engineering College and trained a number of students in the networking area. I'm very much proud bringing back IIHT to Puducherry. IIHT is a pioneer in IT industry providing technical skills to improve employability and to eradicate the term unskilled. I have joined hands with IIHT, so that people from Puducherry get all the facilities to learn recent technologies with updated curriculum from industry experts.

Mr. D.Dinagaran
M.Tech., Ph.D
Pudducherry Centre, India

I am from the computer application background and have completed my Masters in Business Administration and am currently pursuing a Ph.D. I commenced my career with Tata Consultancy Services and stepped into the Academic domain. I have played the role of an academician and was also heading placement for the Department of Management Studies in a reputed institution. I am also a soft skills trainer for both campus and corporate with excellent communication and interpersonal skills with a better knowledge in people handling and decision making. So when I was a child, I witnessed how my brothers and sisters excelled in their careers, because of IIHT. I was always passionate about associating with IIHT, not just because they are into technical training but for the one major reason that IIHT delivers quality training and creates job ready candidates. 'IIHT IS QUALITY AND QUALITY IS IIHT!' This was one of the main reasons that I chose to be a part of IIHT.

Ms.S.Sivaranjani
M.B.A., Ph.D

Placement Pillars

- Interview

Pradeep R
Assistant Manager -
Learning and Development-Netconnect

Q. 1. What according to you is a good resume?
Resume should be short and simple, it is important to highlight points like Qualification, achievements, certificates etc.

Q. 2. What kind of candidate are you looking for?
Candidate should have good communication, confidence, right attitude and most important interest to learn.

Q. 3. On what parameters do you evaluate a candidate?
Parameters like communication, confidence level and willingness, convincing skills, seriousness and flow of thoughts.

Q. 4. How can one prepare himself / herself for an interview?
Preparation is most important, Candidate should understand job description and prepare accordingly. They should practice before interview themselves infront of mirror or make a video.

Q. 5. What is the significance of communication skills during an interview?
Communication is must at workplace as the candidate may have to interact with others. So we analyse the candidate based on the communication level.

Q. 6. Is it important to have good communication skills?
Yes, good communication bring more opportunity towards you.

Q. 7. Why most of the candidates are not able to succeed in their 1st interview?
Fear and nervousness is the biggest reason, hence practice is important.

Q. 8. What are your expectations from freshers and experienced candidates?
For a fresher, going the through the job description is important and also prepare before attending the interview. And experienced candidate should improve the communication and also avoid frequent job hopping.

Placement Pillars

WHY IS IT DIFFICULT TO GET A FRESHER, A JOB?

College life is said to be the best time of a youngster's life. Academically also, it is a very crucial stage. It is during your college days that you prepare yourself, to become a qualified candidate; qualified to bag an awesome job. We choose different fields and streams, according to our interests. We specialise in certain subjects, which later become the core foundation of our career. The year when you graduate, not only brings an epic journey to an end but is also the beginning of another important stage of life. This is when you start implementing all the knowledge that you have gained in the past, to bring monetary stability and satisfaction in your life, through a job. But is it as simple as it seems? Innumerable graduates pass out every year from various streams and apply for jobs in various sectors. Considering a highly populated nation like India, the competition is at its peak.

The information technology industry in India is one of the giant industries. Several job aspirants across the country look forward to pocket a stable IT job. But is everyone successful? If no, why? The answer is very simple. What you learn in college makes you qualified, but it does not make you a perfect fit for a job. Reason being, the lack of right skill sets. The IT industry is constantly evolving and innovating a plethora of emerging technologies. Hence, with this persistent growth, it is very difficult to survive with the limited knowledge that has already become futile. It is important that one continuously upgrades the skill sets required to make it big in the IT market. The recruiters want that, an employee should not only have specialised in a particular subject but should also be willing to embrace change and to keep improving. One should know the organisational culture and should have the ability to transform according to the ever changing nature of this industry.

The academic syllabus is just a foundation or the basics of Information Technology. It has become must, to up skill self and to learn the latest technologies to get recruited and to survive in the industry. Up-skilling is not something that is taught, it cannot be done by any third party, in a matter of few months or through a few courses. It is a prolonged procedure where the candidate itself has to put in efforts, to change. Therefore, it is really difficult to get a fresher, a job, until he or she has the willingness to walk an extra mile to groom themselves, in order to become a perfect fit for an IT organisation.

IIHT is an established IT training institute that has been providing job-oriented courses and interview training, since 1993. Associate with us and let us take you closer to your offer letter.
